

Model 918 Roll Groover

The RIDGID Model 918 Hydraulic Roll Groover forms consistent grooves in steel, copper and plastic pipe up to 12" O.D. The Model 918 Groover's lightweight aluminum frame and broad capacity range make it perfect for field and shop use.

Every feature on the 918 has been meticulously designed with the user in mind. From the hydraulic pump — engineered to give you greater pressure with fewer strokes — to the rapid wheel retraction for faster pipe release.

The 918's quick rollset changeout maximizes uptime and makes it ideal for high production settings.

Key Benefits

- Compact lightweight design allows for easy transport.
- Extensive grooving capacity for a wide range of applications.
- Rugged, durable housing enables unit to withstand harsh use.
- Two-stage pump plus 15 ton ram permit quick and smooth operation.
- Quick, easy set-up.
- Easy Rollset Changeout
- Specifically designed groove and drive rolls produce consistent, accurate grooves throughout capacity range.
