MARCEM

# **DOWNTIME. LOST REVENUE. SAFETY RISKS.**

**All because of a missing part, delayed shipment or miscalibrated tool. Enough is enough...**

With a nationwide presence and decades of industry expertise, Marcem is the global specialist for specialist equipment, calibration, and training solutions.

From remote mining sites to offshore rigs and high-precision manufacturing facilities, we understand the complexities of operating in high-stakes environments. Whether it's sourcing rare tools, ensuring compliance with stringent industry standards, or delivering critical equipment on time, we've delivered practical, cost-effective solutions for over ten years.

**Because when performance matters, Marcem delivers.**

## **Who's on the team?**

Our strength lies in our people. Our team is made up of highly experienced engineers, technical specialists, and sourcing experts who understand the complexity of high-risk, high-performance industries.

Our industry reputation is built on their expertise.

We don't just supply equipment - we offer expertise, problem-solving, and hands-on support, ensuring that every piece of equipment is fit for purpose and every client gets the right solution.

## **We've got our feet on the ground**

Our approach is straightforward: The right tools. The right expertise. The right results.

With strategic nationwide locations and local redundancy, we're always the closest partner to your operations - minimising lead times and downtime risk. We don't overcomplicate solutions, we deliver them. Whether sourcing niche tools, guaranteeing real-time stock availability, or providing rapid-response technical support, Marcem is the partner that keeps industries moving.

# ONE PARTNER

## FOR SPECIALIST EQUIPMENT, CALIBRATION & TRAINING

Marcem provides a comprehensive range of specialist equipment solutions designed to support critical industries. Whether you need controlled bolting tools, high-precision calibration, or hands-on technical training, we have the expertise and the inventory to meet your needs. From offshore platforms to underground mines, power plants to defence installations - Marcem is the specialist partner that delivers.

**Our clients range from local operations to the world's largest industrial players, ensuring they have the right tools and services to operate safely, efficiently, and with absolute confidence.**

# 1

### Sourcing, stocking and delivering tools to meet the pace of your operations

Guaranteed uptime is our commitment. We move as fast as your operations - ensuring you have the tools and equipment you need, exactly when and where you need them.

With an agile supply chain, real-time stock tracking, and branches strategically positioned close to major hubs, we reduce downtime, provide local redundancy and keep your teams fully equipped.

# 2

### When we say we'll deliver, we deliver

Reliability is the foundation of everything we do. We know equipment failures, sourcing delays, and calibration errors can cost millions.

Our customers trust us because we promise reliability and prove it with guaranteed sourcing timelines, damage-free assurance, and emergency support for critical operations.

# 3

### We stock what others don't and source what others won't

Some tools are rare. Some are nearly impossible to find. That doesn't mean they should be out of reach. This is why we've invested in having the biggest fleet and widest access to specialist tools from global leaders like Hydraulic Technologies Bolting, Powerteam, Chicago Pneumatic, Sygma, Easy Laser, SPR, Techmine and more.

And if we don't have it, we'll find it - leveraging our global sourcing network to secure the specialist tools you need, no matter how niche or complex. When others say it can't be done - we find a way. We always have.

# AT YOUR *SERVICE*

Profitable operations demand precision, reliability and efficiency. Delays cost time. The wrong tools create risk. Poor calibration leads to failure. Marcem provides specialised equipment solutions, ensuring that every tool delivers accuracy, performance, and safety.

## ALL TYPES OF TOOLS

**The largest rental fleet of specialty tools, precisely calibrated and ready to go.**

Marcem's nationwide rental fleet ensures you have access to leading global brands, including Hydraulic Technologies Bolting, Powerteam, Chicago Pneumatic, Sygma, Easy Laser, SPR, Techmine and more. Every tool is maintained and calibrated to deliver peak performance, wherever your project is based.

## WHAT DOES YOUR OPERATION NEED?

**Specialised tools from the world's best manufacturers, ready for immediate dispatch.**

Investing in the right tools means investing in efficiency, reliability, and long-term success. Marcem supplies an unrivalled range of specialist equipment, representing the world's premier controlled-bolting and heavy-assembly brands. Every tool is backed by expert servicing, calibration, and after-sales support, ensuring optimal performance from day one.

## CONFIDENCE IN OPERATION AND INTEGRATION

**Specialist-led training to ensure safety, efficiency, and long service life.**

The right tools are only as effective as the people using them. Operator training ensures safe handling, troubleshooting, and on-site maintenance, reducing downtime and inefficiencies. Marcem provides customised training solutions, from formal courses and VOC assessments to on-site instruction. Whether training is part of your hire package or a long-term capability-building program, we ensure your team is equipped to work safely and efficiently.

## CALIBRATED FOR ACCURACY, CERTIFIED FOR RELIABILITY

**Precise calibration services to maintain performance and compliance.**

Marcem's NATA-accredited, ISO 17025 certified calibration laboratories provide testing and certification for manual and hydraulic wrenches, as well as pressure gauges up to 40,000 PSI. Every tool calibrated in our labs is fully recorded within our Quality Management System, ensuring every instrument delivers accurate, repeatable results

# OHLMEC

WA-based Specialist Mining Contractor

## CASE STUDY

With a team of 80 and operations spanning from Kalgoorlie to WA's far north, Ohlmech's work is complex, high-stakes and often reactive. For Jesse Ohi, Managing Director of Ohlmech, having the right tools on hand is a necessity. That's why Marcem is now integral to their off-site fabrication workflow.

Initially recommended through industry referrals and their own Operations Manager, Marcem quickly proved their value with proactive support, reliable gear, and a flexible, no-fuss approach.

From critical fastening and hucking tools to urgent hires, the Ohlmech team knows Marcem can source what's needed - even if it's after hours.

With a strong relationship built around trust, responsiveness, and shared understanding, Marcem helps Ohlmech avoid downtime and focus on delivering for its clients.

*We don't use anyone else anymore. Marcem's become part of how we operate.*

*I've called on a Saturday night, and Josh has delivered. The tools are reliable, and if they don't have it, they'll find it or buy it. Then they hire it back to us.*

*If someone's having supplier issues, I tell them - just call Marcem. They solve problems. Simple as that.*

# MONADELPHOUS

Leading Australian Engineering Group

## CASE STUDY

With large-scale projects spanning resources, energy, and infrastructure, Monadelphous operates in environments where timing, precision, and safety are everything. For Kellie, P&E Coordinator at Monadelphous, that means working with suppliers who are not just responsive, but genuinely invested in finding solutions.

### That's where Marcem comes in.

Marcem supports Monadelphous across multiple touchpoints, from tool hire and purchasing to maintenance of equipment critical to project execution. On average, the teams connect monthly, whether for upcoming project discussions over coffee or direct tool support.

It's that honesty and ease that stand out. Kellie appreciates that if Marcem can't assist, they'll say so - rare, but refreshingly upfront. As a tight-knit operation, Marcem removes the friction from procurement: no layers of approvals, no long waits. Just solid advice, fast delivery, and tools that get the job done.

### For Monadelphous, that reliability is everything.

*They are so good to us. They really do go the extra mile, and that's exactly why we've continued the relationship with them.*

*When we don't know exactly what we need, we call Josh or Tori. They'll always steer us in the right direction.*

# ALWAYS WITHIN REACH

Our nationwide offices and facilities ensure rapid response times, local expertise, and seamless tool delivery across Australia. Our clients work in mining, oil & gas, energy, construction, defence, and infrastructure.

**Where work happens, Marcem delivers.**

# THE RIGHT TOOL, EVERY TIME

Marcem's rental and supply fleet is one of the most comprehensive in the region, equipped to handle everything from controlled bolting to large-scale lifts. Whether your project demands finesse, force, or both – we've got the gear, the expertise, and the backup.

**If your job's got a spec, we've got a solution – ready to go and ready to work.**

## Our range includes:

- **Heavy Lift Equipment** – for structural assemblies and relocations
- **Precision Laser Alignment** – to ensure machinery integrity and operational efficiency
- **On-site Machining** – including flange facers, clamshell cutters, and pipe threaders
- **Torque & Tension Tools** – both hydraulic and battery-powered
- **Huck Bolting Systems** – trusted in critical infrastructure applications
- **Wind Tensioners** – designed for renewable energy installations
- **Calibrated Tools** – every tool backed by NATA-accredited calibration for compliance and confidence

## WHERE PERFORMANCE MATTERS MOST, MARCEM SHOWS UP.

From deep underground to offshore rigs, our tools, training, and technical support keep the most demanding industries moving. We understand the environments you operate in: harsh, remote, high-pressure, and we're built to match.

## We support clients across:

- **Oil & Gas** – onshore and offshore
- **Mining & Resources** – including surface and underground sites
- **Renewables** – wind, hydro, and emerging energy sectors
- **Water & Utilities** – treatment, distribution, and infrastructure
- **Heavy Machinery** – manufacturing and field service
- **Bridge & Building Assembly** – structural bolting, lifting, and relocation

## WHATEVER THE SITE, WHATEVER THE CHALLENGE, MARCEM DELIVERS.

**EVERY TYPE  
OF TOOL.**

**EVERY  
ENVIRONMENT.**

**ANYWHERE  
YOU OPERATE.**
